

NCL'S PEACE OF MIND

SAIL SAFE | FLEXIBLE BOOKING

The health, safety and comfort of our guests and crew members both on board and on shore is our number one priority. We are ever-evolving our SAIL SAFE programme – taking every precaution to protect you. This is just the start of a wave of new technologies and enhancements we are rolling out, so you can explore the world with us with the ultimate Peace of Mind.

ENHANCED SCREENING PROTOCOLS

All guests will undergo an enhanced pre-embarkation health screening, and those considered at risk will undergo additional screening. Additionally, all crew will undergo extensive screening prior to embarkation and constant monitoring throughout the voyage. Touchless temperature checks and continuous monitoring of guests and crew throughout the voyage will help identify potential health issues, offering an additional layer of prevention and protection.

- Checks will occur:
 - Prior to embarkation;
 - Upon returning to the ship while in a port of call;
 - Prior to all meals in dining venues;
 - Prior to activities in public venues and
 - Prior to disembarkation.
- A healthy crew helps ensure healthy guests. Constant monitoring of crew health includes temperature checks multiple times per day as well as rigid sanitation protocols.
- All on board crew members will have undergone the latest, most advanced form of COVID-19 testing at the start of their employment contract.

INCREASED SANITATION MEASURES

All ships are disinfected, evaluated, and certified as virus-free when they re-enter service. This service is performed by Sabre BioResponse, the world leader in decontamination services. Embarkation terminals will be sanitized continuously, and, where possible, fogged before and after each embarkation and debarkation. Further, all staterooms, suites and public areas will be cleaned, sanitized and disinfected at an increased frequency, and include the use of Electrostatic Spray Technology. Increased sanitation efforts include:

- Fogging in staterooms and public areas with the disinfectant hypochlorous acid (HOCl). Hypochlorous acid is a non-toxic, powerful oxidant that effectively kills bacteria, spores, and

viruses. It is natural and safe to use in open areas since it is comprised of natural elements such as water and salt, and electric charge.

- Our 24/7 prevention schedule will feature continuous disinfection of public areas and high-traffic touch points. We will ensure that cleaning occurs continuously for all elevators and all public areas during on and off-peak hours.
- Buffets and beverage stations will be full service with staff available to serve guests.
- All guests will be strongly encouraged to engage in frequent handwashing, including when entering food and beverage venues, and hand sanitizer will be prominently placed and easily accessible throughout the ship.

ALL-NEW AIR FILTRATION

Installation of hospital-grade air-filters, H13 HEPA, that remove 99,95% of airborne pathogens across our entire fleet to ensure the air you breathe is clean.

- H13 HEPA is one of the highest grades of particulate air filter, removing 99,95% of all particulates 0,1 microns or larger. For comparison purposes, COVID-19 is 0,125 microns (25% larger), a single blood cell is 5-10 microns (5.000% larger) and a single human hair is 75 microns (75.000% larger).

RESPONSIBLE SOCIAL DISTANCING

To provide even more space for responsible social distancing, guest capacity on board will be reduced. Staggered embarkation and advanced online check-in will be implemented for proper social distancing. In addition, we are committed to reducing capacity in all public areas throughout the voyage.

- We continue to work with port and government authorities to determine procedures that are in accordance with CDC and global health agencies' guidance, to implement protocols that allow for proper social distancing during the embarkation process, including staggered embarkation and advanced check-in procedures.

- All onboard activities will still be available, although operated at a reduced capacity, and in some cases, slightly modified in order to ensure safe social distancing. We will take necessary precautions and follow applicable public health guidelines to ensure guest health and safety, which is our highest priority at all times.

ENHANCED MEDICAL RESOURCES

Onboard medical centers will be fully equipped with the latest testing kits and medical supplies. We are also increasing our medical team fleetwide. Additionally, each ship has dedicated isolation accommodations should the need arise.

- Testing kits and medical supplies include:
 - Advanced on site rapid diagnostic testing for COVID-19
 - Increased inventory of medical oxygen equipment
 - Increased inventory of vaccinations
 - Increased inventory of medications to treat COVID-19
- We're implementing enhanced health & safety trainings and continued education for crew members.
- Each ship will have a dedicated Public Health Officer on board, responsible for the oversight of all sanitation and outbreak prevention initiatives.

EXTENDED SHIP TO SHORE SAFETY

- We're partnering with our local destinations and tour operators to ensure our industry-leading health and sanitation protocols extend to the shoreside experience.
- We will only visit safe, open ports of call which may cause changes to the itinerary. Keeping our guests up-to-date with the latest confirmed changes impacting their itineraries is a top priority.
